## Professional Summary

Technical professional transitioning to Offensive Cybersecurity and DevSecOps, with a solid foundation in software development (Java/.NET). Self-taught and proactive, I have deployed a **Security Operations Laboratory (SecOps)** documented on GitHub, where I perform Red Teaming simulations, Cloud server hardening (AWS), and evasion tool development. I am looking to contribute my analytical skills and secure software development expertise to a SOC or Pentesting team.

## Cybersecurity Experience and Projects

2024–Present **Cybersecurity Operations Laboratory (SecOps Lab)**, *GitHub Portfolio*, Remote

- **Offensive Security (Red Teaming):** Research and development of antivirus evasion techniques using **HTML Smuggling** and creation of Loaders in **C++ with RC4 encryption** to bypass static signatures.
- **Wireless & Web Auditing:** Execution of controlled attacks including WPA2 Handshake capture, **Evil Twin** deployment, and exploitation of Web vulnerability chains (Reflected XSS + Open Redirect).
- **Cloud Infrastructure & Hardening:** Deployment of instances on **AWS EC2** for pentesting. Configuration of a secure on-premise NAS server with Ubuntu Server, storage management (MergerFS), and remote access via VPN Mesh (Tailscale).
- **Automation (DevSecOps):** **Python** scripting for security tools and task automation.

## Software Development Projects

2023 **Dynamic Web Application (E-Commerce)**, *Academic Project*

Development of an SPA (Single Page Application) using **React.js**, HTML5, and CSS3. Implementation of fluid navigation, state management, and API consumption.

2023 **.NET Modular System**, *Academic Project*

System development in C# (.NET MVC) with secure login modules, role-based user management, and PDF report generation. SQL Server database.

## Academic Background

2023–Present **Computer and Information Technology Technician**, *Cibertec*, Lima

2025 **Certified Course in Ethical Hacking Junior**, *Pentester Junior*, Online  
Certification focused on pentesting methodologies and the use of auditing tools.

2019 **Computer Assembly and Maintenance**, *SISE*, Lima

## ████████ Technical Skills

Cybersecurity dad Metasploit, Burp Suite, Wireshark, Nmap, Aircrack-ng, AV Evasion, Hardening.

Cloud & OS AWS (EC2, Security Groups), Linux (Kali, Ubuntu Server), Docker, CasaOS.

Development Python (Scripting), C++ (Malware Dev), Java, C# .NET, React.js, Git/GitHub.

Databases MySQL, SQL Server, MongoDB.

Databases

## ████████ Languages

Native Spanish

Intermediate Technical English      *Fluency in reading technical documentation (RFCs, write-ups) and writing.*
